

OYINATUMBA KAMSI

Backend developer with hands-on experience building RESTful APIs and production-grade fintech infrastructure using Java and Spring Boot. Passionate about writing clean, maintainable code and collaborating in agile team environments to deliver reliable software solutions.

EXPERIENCE

HNG TECH, Lagos (Remote) – Backend

Developer (MAY 2024 – NOVEMBER 2024)

- Worked in a fast-paced collaborative team environment to build and improve backend features while meeting weekly deadlines.
- Tested API using tools such as Postman and participated in debugging and resolving backend issues.
- Implemented request handling, and basic error management for API endpoints.
- Used Git and GitHub for version control, contributing to team repositories through commits, pull requests and code review.

PROJECTS

TRUSTVAULT — FINTECH ESCROW PLATFORM

Live (<https://trustvault-escrow-fznr.vercel.app>)

Tech: Java 21, Spring Boot 3.2, Spring Security, PostgreSQL, Paystack, AWS S3, React 18, TypeScript, Docker

- Built a production-grade P2P escrow platform securing buyer funds and releasing them only when agreed conditions are met.
- State-machine lifecycle: CREATED → ACCEPTED → FUNDED → FULFILLED → RELEASED (or DISPUTED/CANCELLED).
- Paystack webhook integration with HMAC verification, idempotency guards, automated escrow holds and seller payouts.
- Dispute center with evidence upload (images/docs) to AWS S3; admin-governed resolution with refund and payout overrides.
- Automated KYC pipeline: NIN + DOB verification against the federal identity database via IdentityPass/VerifyMe.
- Granular RBAC admin panel (Super Admin, Compliance Officer, Finance Admin) with live config and Recharts analytics.

JWT AUTHENTICATION & AUTHORISATION API

GitHub (<https://github.com/kamscodes/auth-api-jwt>)

- Built a secure RESTful authentication system using Spring Boot and Spring Security.
- Implemented JWT-based stateless authentication with custom filter integration.
- Applied BCrypt password hashing, role-based access control, and custom exception handling.
- Designed and integrated MySQL database using JPA/Hibernate; tested with Postman.

EMPLOYEE MANAGEMENT CRUD API

GitHub (<https://github.com/kamscodes/crud-rest-api>)

- Developed a SpringBoot REST API for managing employee records (Create, Read, Update, Delete).
- Integrated MySQL using Spring Data JPA; layered architecture (Controller, Service, Repository); global exception handling.

EDUCATION

Nnamdi Azikiwe University- 2nd Class (Lower Division) B.Sc. Quantity Surveying – May 2021 – September 2025

TECHNOLOGIES

- Java 21
- Spring Boot
- Spring Security & JWT
- PostgreSQL & MySQL
- JPA / Hibernate
- Flyway
- Paystack Webhooks
- AWS S3
- Docker
- REST API Design
- Git & GitHub
- Postman
- React 18 (basic familiarity)
- TypeScript(basic)
